## 1. Who are we?

We are an online language school and the best language learning website, and, like any school, we offer live classes with certified, native speaking teachers. We believe that nothing can replace live interaction and customised feedback from a real person.

## 2. Our method

Communicative language teaching emphasizes interaction with one another and the instructor, the study of "authentic texts" (those written in the target language for purposes other than language learning), and through the use of the language both in class and outside of class.

Learners converse about personal experiences with the teacher, and instructors teach topics outside of the realm of traditional grammar, in order to promote language skills in all types of situations. **We try to encourage learners to incorporate their personal experiences into their language learning environment.** Our goal of language education is the ability to communicate in French. The approach is a non-methodical system that does not use a textbook only, but rather works on developing oral skills prior to reading and writing.

## The Exposure

Students are not directly presented with a target grammatical structure or rule. Instead, students are given content in which the target structure is used and then discover the grammatical rule or figure out the pattern for themselves.

## Rules & Exercises

The teacher's role is to guide students to their own discovery, not to give students the information on the grammar rule. Because they have learned grammar by figuring out the rules from context, students have an easier time figuring out unfamiliar grammatical structures they encounter in the future. This makes them better able to cope when they are faced with a grammar point they did not already learn in class. However, the student is not left alone and the teacher guides them with suggestions and examples.

## Automatisation

Automatisation is a system of drill exercises so that correct usage become completely automatic. It helps students automatise the language they might already know but still struggle to use confidently and naturally, or eradicate fossilised errors. Our teachers use real-life situations and set the context and make it meaningful. We try to implement natural features of the spoken discourse into the drill.

## Use it to learn it

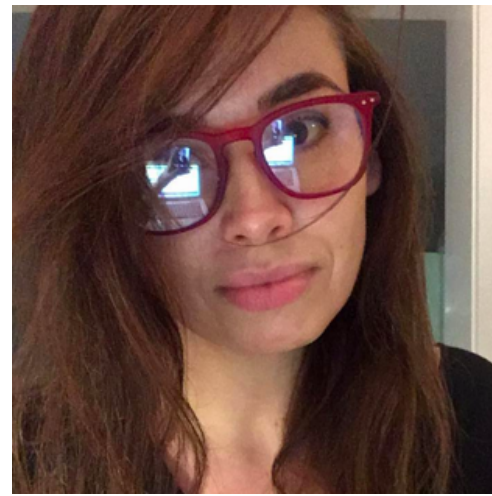

It takes only about 10-20 lessons to start to speak French! Be patient: at first, your teacher will fill up your "tool box" with necessary information. In the second stage of your learning, the teacher focuses on the use of authentic language and on asking students to do meaningful tasks using French. Such tasks can include visiting a doctor, conducting an interview, or calling customer service for help. In more advanced level our students watch videos, read articles and talk about their opinions about various topics.

## French for children

Nowadays there is no need to convince anyone that foreign languages should be taught **at the earliest possible age**. This is often what success at a later age can depend on. Exposing children to the proper pronunciation and immersing them in the language at a young age significantly increases their motivation and the ease with which they acquire linguistic competence later in life.

Our teachers have years of experience and a **solid pedagogical background**. But they also love kids! Lessons are real fun: we sing, we play, we repeat, we laugh .. all that kids love to do! Children achieve a perfect pronunciation without even noticing the hard work they do. Getting ready for A-levels or other exams is much easier later on if the child practices at an early age.
